1. **Tools and techniques:**
   - MongoDB
   - Express
   - React
   - Node
   - Tailwind CSS
   - Material UI
   - Vite

2. **Features:**
   - Add User
   - View Users
   - Realtime search (instead of simple search on dropdown names list) based on filters
   - Responsive UI
   - Simple Auth, Session's implementation
   - Frontend, backend validations

3. **Admin Panel Username and Password:**
   - admin@gmail.com
   - admin

4. **.env: (I have uploaded .env with in git repo)**

```
MONGODB_URI=mongodb+srv://gomobit:gomobit@cluster0.lihuarh.mongodb.net/gom
obit
PORT=8080
```

5. **Time taken to complete the project:**
   - 2 hours.
